mobile: (734) 218-5869

NOVEMBER 2013 – APRIL 2015

UX Designer/Developer ▶ i360 LLC

- ▶ UX and visual design for iOS and Android native mobile applications
- ▶ UX, visual design, and HTML/CSS UX and visual design for iOS and Android native mobile applications UX and visual design for iOS and Android mobile applications
- ▶ HTML/CSS re-writing and refactoring for a suite of complex Web applications

During my time at i360, a political data analysis company, I designed iOS and Android UIs for two mobile apps: i360 Walk, which supported door-to-door canvassers, and i360 Calls, which was part of a phone-canvassing system. Both apps were employed by thousands of volunteers and garnered praise for their ease of use. I additionally designed and coded HTML/CSS for a web-based version of i360 Calls.

I also led an initiative to re-write the HTML/CSS for a web application based on the Object-Oriented CSS approach.

MAY 2011 – SEPTEMBER 2013

Art Director & Senior Editor ▶ American Ideas Institute / TAC

- ▶ Design, project management, development, and maintenance of theamericanconservative.com
- ▶ Art direction and layout of monthly print magazine

At TAC, in addition to editorial tasks, I was responsible for the design and art direction of the print magazine and website. I also adapted TAC to the Kindle and produced a Kindle edition for each issue.

I led a redesign of TAC's website, after which traffic increased threefold, with one month bringing more than two million page views.

JULY 2009 – MAY 2011

Associate Editor ▶ The American Interest

- ▶ Art direction and layout of print magazine
- ▶ Web design and template production

My art direction duties for The American Interest included magazine layout, designing spreads, creating illustration concepts, and commissioning illustrations from artists.

I also created wireframes and design comps for a redesign of the AI's website. From this design I produced Wordpress templates for the AI's blogs.

JANUARY 2008 – APRIL 2009

Web Designer ▶ Hanley Wood

- ▶ Website design and production

Hanley Wood is a media and e-commerce company focused on its family of trade publications for the building industry. At Hanley-Wood much of my work consisted of producing HTML and CSS during a transition of their online publications to the Tridion CMS. I also did design and coding work on their network of sites that sell house plans online.

MAY 2000 – AUGUST 2004

Senior Designer ▶ Fleishman-Hillard

- ▶ Design and production of websites for Fortune 500 clients

At Fleishman-Hillard, a top public relations firm, I designed, coded, and produced websites for corporate clients. I also was involved in many Flash animation projects, including ads, CD-ROM multimedia projects, and internal messaging.

I'm a UI designer and front-end developer. In addition to having designed and coded many websites, I have served as a UX and design lead for native iOS and Android apps as well as desktop web-based applications.

I have more than ten years of experience building websites and web apps using HTML, CSS, Javascript, and more recently, LESS and Sass.

I'm eager to put my experience to work employing UX best practices in support of a forward-thinking organization.
